BT-PS-318	1800mm W x 300mm D

Providing absolute value for money, BenchTech is ideal for use in projects such as teaching kitchens, canteens, cafes and restaurants.

Built to true commercial specifications, the BenchTech modular system can be used for a full kitchen fit-out or integrated with custom-made Britex benches and shelves to achieve a more cost effective overall project solution.

In a market that has traditionally focused heavily on price at the expense of quality, BenchTech offers a range of benefits based around quality and innovations that elevates it above all others. The true value for money that BenchTech offers in its modular benching, shelving and ancillary products is second to none.

WHY CHOOSE BENCHTECH?

INNOVATION

It's the extra effort we go to that elevates us above mediocre, 'industry standard'. Our benches are backed with a 2mm corrosion resistant zinc plated substrate for optimal strength and are scalloped around the bowl edges for more efficient drainage. Our sink bowls are supplied with 90mm European style wastes (50mm connection to accommodate waste arrestors as required in certain states) and our undershelves are adjustable in height for greater adaptability.

EXPERTISE

Having been in the business for over 75 years, we are true specialists in Stainless Steel manufacturing. We are not simply an 'importer and distributor'. We know what clients expect in commercial quality Stainless Steel products and we know how to deliver.

MATERIAL

BenchTech uses commercial grade 304 Stainless Steel – recognised around the world as the material best suited to commercial environments. Why? Because it has a higher resistance to corrosion and a longer product life than cheaper but inferior grades. For this reason, other suppliers may deliberately omit this information from their product literature.

FLEXIBILITY

In addition to our extensive range of standard products, we specialise in custom fabrication. This is done in our own local, state of the art Stainless Steel manufacturing facility.

PACKAGING

To guard against the major frustration of products being damaged in transit, BenchTech products are packed inside a unique 'honeycomb' packaging that provides optimal protection for the contents inside.

AVAILABILITY

Our best efforts are made to ensure all products are kept in stock and ready to be despatched promptly to any location Australia-wide.

LIFETIME WARRANTY

We have such confidence in our quality that we offer a lifetime warranty for all our products in the BenchTech range. If the product fails due to our workmanship or a defect in the materials we will replace the item at no charge. For further warranty details, contact Britex.

BENCHTECH OVERVIEW
