- Concealed tapware connections
- Radius internal corners - easy cleaning
- Fully welded construction
- Optional Clay & Plaster arrestor

about

The *BRITEX Stainless Steel Flat Rim Clay & Ablution Trough* is multipurpose in design and is commonly found in practical activity education classrooms. One half of the trough is supplied with a raised (standing) waste, ensuring solid matter like clay, plaster and soil settle in the bottom of the trough, whilst clean water drains through the perforated top, thus preventing blockages. The other half of the trough is used for general purpose hand washing. Radius internal bowl corners allow for easy cleaning. Compatible with the BRITEX Plaster and Clay Tank - US-OSPC.

sample spec. text
