Please Note:

Britex Stainless Steel Squat Pans are intended for sale within the Asia Pacific market and do not currently hold Australian WaterMark or WELS certification. If the squat pans are to be purchased and installed within Australia, product approval should be sought from the applicable governing authorities prior to purchase.

Product Info:

- One piece, seamless construction
- Can be installed elevated or recessed into floor
- Integrated foot stands
- Supplied with water spreader

INSTALLATION NOTES

1) Suits flushing via in-wall/wall mounted cistern or flush valve. Squat Pan is supplied with a rear water entry, concealed underneath the pan body. 2) Access must be provided to water connection point before finishing floors. 3) A slurry bed or support frame below squat pan is recommended for added support and to prevent flexing of standing area. 4) Tube dropper waste can be inserted into a sewer pipe riser with a trap immediately below.
