INSTALLATION NOTES

1) Fixture strength is ultimately determined by the load capacity of the supporting structure (noggins recommended for stud walls) and use of appropriate fixings. **2)** Basin is secured to wall with an offset bracket positioned behind the rear/top of the basin. **3)** Trap and fixings (other than offset bracket) not supplied.

For HBVRC-W: Two additional fixing points are integrated into the basin body near the base. Remove access panel in base to fit off plumbing and wall fixings then replace panel.

For HBVRC-F: Front fixed model is supplied with a side access panel. Rear fixed model supplied without access panel. Six additional fixing points are integrated into the sides of the basin body and three in the base.
